

INSTALLATION INSTRUCTIONS

ASSEMBLY AND INSTALLATION

- 1. Turn off the power.
- 2. Remove fixture screws to release mounting plate
- 3. Secure the Mounting plate onto the Outlet Box by the Screw. Connect supply wires to fixture wires and insulate with proper size wire nuts
- a) Connect ground wire (green or bare) to fixture ground wire (green or bare).
- c) Connect hot (typically black) wire to fixture black wire. b) Connect common (white) wire to fixture common(white).
- 5. After wires are connected, tuck them carefully inside the Outlet Box.
- 6.Install fixture body to mounting plate and secure it with fixture screws. Fixture should be secure against wall.
- 7.To prevent moisture from entering the outlet box and causing a short, seal around the top and side perimeter between the fixture and the wall surface with weather resistant caulking (see illustration 2). The space at bottom should be left un-caulked to prevent moisture build-up.
